Q&A

Exam : **300-175**

Title : Implementing Cisco Data Center Unified Computing (DCUCI)

Version : DEMO

1.Which item describes the failure scenario called a "split-brain" in the Cisco Unified Computing System?
A. failure of the Cisco Unified Computing System L1-L2 network
B. failure of a Cisco Unified Computing System Chassis Management Controller
C. failure of a Cisco Unified Computing System I/O module
D. failure of a Cisco Unified Computing System Fabric Interconnect
E. failure of a Cisco Unified Computing System Chassis Management Switch
Answer: A

2.Which two are true concerning the role-based access control specifics of a Cisco Unified Computing System? (Choose two.)
A. Disabled local user accounts are deleted from the database.
B. A locally authenticated user account is any user account that is authenticated through LDAP, RADIUS, or TACACS+.
C. If a user maintains a local user account and a remote user account simultaneously, the roles that are defined in the local user account override those that are maintained in the remote user account.
D. By default, user accounts expire after 90 days; a warning message will be generated 10 days prior to expiration.
E. A user that is assigned one or more roles will be allowed the privileges that are consistent across all of the assigned roles.
F. All roles include read access to all configuration settings in the Cisco Unified Computing System domain.
Answer: CF

3.Which two are true concerning authorization within a Cisco Unified Computing System? (Choose two.)
A. A role defines a collection of privileges that determines which actions a user can take in Cisco Unified Computing System Manager.
B. Authorization consists of three components (roles, password policy, and locales) that are based on which features and resources the user will not have access to.
C. Customized roles can be configured on and downloaded from remote AAA servers.
D. The logical resources, pools and policies, are grouped into roles.
E. If the service profile cannot find available resources, it will search in the parent organization for pools and resources.
Answer: AE

4.Which two are true with respect to the upgrade process for the Cisco Unified Computing System? (Choose two.)
A. For easier manageability, Cisco provides one full bundle that contains the firmware images for all Cisco Unified Computing System components.
B. You can choose from FTP, TFTP, SCP, and HTTP to copy the bundle image from a remote file system.
C. When the bundle image is downloaded, it must be transferred to the flash file system of the active fabric interconnect.
D. When the download is successful, Cisco Unified Computing System Manager expands the individual files from the archive and installs them in the correct flash file system partition.
E. It is strongly recommended that you activate all components in all chassis at one time.

F. The I/O module, CIMC, and adaptors update process operates strictly on the backup partition of Flash for a given component.
Answer: CF

5.Which Cisco UCS firmwares are contained in the Cisco UCS Infrastructure software bundle? (Choose three.)
A. Cisco UCS BIOS
B. Cisco UCS fabric interconnects firmware
C. Cisco UCS adapters
D. Cisco UCS Manager
E. Cisco I/O module firmware
F. Cisco IMC
Answer: BDE
