# Q&A

**Exam** : **650-159**

**Title** : ICA Cisco IronPort Cloud Associate

**Version** : DEMO

1.What important consideration do you need to be aware of when using a Connector?

A. Multiple DHCP servers

B. Multiple DNS servers

C. Multiple break-out points

**Answer:** C

2.How can AnyConnect be bypassed by a user when installed locked-down?

A. When locked-down, AnyConnect can be bypassed by a user by changing the Browser Proxy settings

B. When locked-down, AnyConnect can be bypassed by a user if they know the admin password

C. AnyConnect cannot ever be bypassed by a user when installed locked-down

**Answer:** C

3.How are different time zones supported by WIRe?

A. Each entry is converted to UTC as it is stored, so you can select any time zone in the GUI when searching and see the times according to the user's local time

B. All entries are recorded only in their local time zone, so you need to calculate the time offset when searching for data of users in different time zones

C. There is no support for different time zones in WIRe

**Answer:** A

4.If a customer wants roaming protection for laptops with Windows 7 64 bit, and is not using Cisco's VPN, which one of the following would be the best solution:
