Q&A

Exam : **AND-401**

Title : Android Application Development

Version : DEMO

1.What method you should override to use Android menu system?

A. onCreateOptionsMenu()

B. onCreateMenu()

C. onMenuCreated()

D. onCreateContextMenu()

Answer: A

Explanation:

To specify the options menu for an activity, override onCreateOptionsMenu() (fragments provide their own onCreateOptionsMenu() callback).

References: http://developer.android.com/guide/topics/ui/menus.html

2.What Activity method you use to retrieve a reference to an Android view by using the id attribute of a resource XML?

A. findViewByReference(int id);

B. findViewById(int id)

C. retrieveResourceById(int id)

D. findViewById(String id)

Answer: B

Explanation:

The findViewById(int id) method looks for a child view with the given id.

References: http://developer.android.com/reference/android/view/View.html

3.Which of the following is not an Android component (i.e. a point from which the system can enter your application)?

A. Service

B. Activity

C. Layout

D. Content Provider

Answer: C

Explanation:

Here are the four types of app components: Activities, Services, Content providers, and Broadcast receivers.

References: http://developer.android.com/guide/components/fundamentals.html

4.During an Activity life-cycle, what is the first callback method invoked by the system?

A. onStop()

B. onStart()

C. onCreate()

D. onRestore()

Answer: C

Explanation:
