Q&A

Exam : **HP0-D04**

Title : Planning and Designing HP Enterprise Solutions

Version : DEMO

1.Your customer is looking for a simplified way to handle hardware and software issues across worldwide IT departments. Which hardware support services should you offer?

A.Global Support Resources

B.Mission Critical and Proactive Services

C.Global Call Management

D.HP Mission Critical Partnership

Answer:C

2.Your customer wants to use their standard servers and storage systems for a massively scalable Information Management solution. Which solution addresses this requirement?

A.Oracle RAC 10g

B.NeoView Enterprise Data Warehouse

C.PolyServe Software for Microsoft SQL Server

D.SAP Sideways

Answer:B

3.Which HP initiatives help the customer to deliver faster innovation and improved time to market? (Select two.)

A.Application Modernization

B.Packaged and Custom Applications

C.SOA Enablement

D.SAP Deployments

E.Line of Business Service

Answer:C E

4.Which HP Power and Cooling service helps create an energy-efficient infrastructure?

A.Critical Facilities Consulting

B.Trusted Infrastructure

C.Data Center Management

D.Flexible Computing Services

Answer:A

5.An enterprise customer is undertaking a new initiative involving floating-point calculations. The customer needs a solution that enables them to break these operations into smaller tasks and re-integrated later. Which type of technology would be a good fit for this customer?

A.hard partitions

B.grid computing

C.active/standby clustering

D.workload management

Answer:B

6.A customer is currently using a SAN data-protection solution. It has 45 heterogeneous servers, three HP StorageWorks EVA8000 series storage solutions, and an MSL6000 series SAN tape library. Data backup occurs only once daily after operating hours because of the limited backup window. Which HP StorageWorks products should you propose to enhance and optimize their off-site data protection strategy? (Select two.)

A.LTO tape drives

B.Virtual Library System

C.ESL E-Series tape library

D.XP series storage system

Answer:A D

7.Your customer's environment consists of a 300GB Oracle database on a ProLiant DL580 server running Windows Server 2003, connected to an EVA4400 storage solution with an MSL4048 tape library as backup device. You are asked to design a solution using HP Data Protector that will eliminate database outages currently required for backups. Which licenses are necessary to implement this design? (Select two.)

A.Direct Backup

B.Advanced Backup-to-Disk

C.Zero Downtime Backup EVA

D.Business Copy EVA

E.Instant Recovery

Answer:C D

8.How much of an increase over standard cooling capacity does the HP Modular Cooling System provide?

A.1.5x

B.2x

C.3x

D.4x

Answer:C

9.A customer wants to maximize the use of its data center rack space. Which server solution should you recommend?

A.rack-optimized HP ProLiant DL servers

B.expansion-optimized HP ProLiant ML servers

C.integration-optimized HP Integrity servers

D.high-density-optimized HP BladeSystem servers

Answer:D

10.Which HP support service includes 6-hour Call-to-Repair by default?

A.Proactive 24

B.Support Plus 24

C.Critical Services

D.Proactive Support Plus 24

Answer:C
