Q&A

Exam : **HP2-H05**

Title : Design & Implementation of HP Thin Client Solutions

Version : Demo

1.Which HP Remote Client Solution is best for a task-oriented user?

A. HP Blade Workstation

B. Server Based Computing

C. HP Virtual Desktop Infrastructure

D. Hp Blade PC

Answer: B

2.Which protocols does HP support to access HP blade workstations remotely (Select two)

A. ICA

B. VNC

C. RDC

D. RGS

E. RDP

Answer: D,E

3.What are the characteristic of a Knowledge Worker user group (Select two)

A. richer graphical applications

B. many simultaneous user logins

C. multiple display support requirements

D. multiple business or productivity applications open simultaneously

E. fewer application types

Answer: B,D

4.Which Virtual Desktop Infrastructure (VDI) solutions are recognized by HP (Select two)

A. HP Blade PC

B. VmWare View

C. Citrix XenApp

D. HP Image Manager

E. Citrix XenDesktop

Answer: B,E

5.Which operation system of HP thin clients fully implements the features of the HP Session
Allocation Manager (SAM) broker?

A. HP ThinConnect

B. MS Windows CE

C. MS Windows XPe

D. MS Windows Vista

Answer: C

6.A medium-sized bank has upgraded to the most recent Citrix XenApp environment. The
have asked you to provide thin client access devices. In addition to standard ICA access,
they need support for their local printers and would like to use XenApp's Web Interface 5.0
feature.
Which HP thin client models should you suggest as the best cost-effective option for them?

(Select two)

A. 2533t

B. 6720t

C. t5145

D. t5540

E. t5630

Answer: D,E

7.Which models belong to the Flexible product line in HP thin client portfolio (Select two)

A. 6720t

B. t5730

C. t5145

D. t5630

E. t5540

Answer: B,D

8.What is the role of a connection broker?

A. provides encryption between client and resources

B. determines resource type allocation based on user identity

C. manages golden images and their distribution to compute resources

D. provides a connection between the server and the computer resources

Answer: D

9.Which remote protocol has a client implementation on all major operating systems?

A. HP RGS

B. Citrix ICA

C. MS RDP

D. X Display Manager Control Protocol

Answer: B

10.To which product line classification in HP thin client portfolio does the HP 2533t model belong?

A. Mobile

B. Flexible

C. Essential

D. Mainstream

Answer: A

11.Your customer requires the lowest-cost thin client solution with only basic connectivity, integrated connection brokers, no browser or terminal emulation support, and the most essential peripheral support.

Which thin client operating system should you recommend?

A. HP ThinPro

B. HP ThinConnect

C. MS Windows XPe

D. MS Windows CE

Answer: B

12.Which thin client operating systems should you recommend to a customer who requires high software extensibility? (Select two)

A. HP ThinPro

B. MS Windows XPe

C. HP ThinConnect

D. HP ThinPro Plus

E. MS Windows CE

Answer: B,D

13.Which HP thin client operating system includes the features listed below?

Case Study Title (Case Study):

Basic connectivity: ICA/RDP/X-term

Software extensibility: Modest - some modules can be download from HP

Peripheral support: Wide

Local browser: Firefox

Terminal emulation: TeemTalk

A. HP ThinPro

B. HP ThinConnect

C. MS Windows XPe

D. MX Windows CE

Answer: A

14.Which features are exclusively available with the Windows Xpe operating system and not with the other operating systems supported on the HP thin clients? (Select two)

A. media player

B. Smart Card support

C. Enhanced Write Filter (EWF)

D. Symantec Endpoint Protection

E. locked-down configuration and accounts

Answer: C,D

15.What is the mail-in warranty turnaround time for HP thin clients sent to HP for repair?

A. 8 hours

B. 16 hours

C. 24 hours

D. 48 hours

Answer: D

16.Your customer needs to connect to and communicate with applications on mainframes and midrange systems running proprietary operating systems, UNIX, and Linux.

Which HP thin client operating systems provide this ability through their support of the Neoware TeemTalk terminal emulation? (Select three)

A. HP-UX 11i
B. HP ThinPro
C. MS Windows Vista
D. HP ThinConnect
E. MS Windows CE
F. Windows XPe

Answer: B,E,F

17.Which HP thin client has stateless mode capability?

A. t5545 (HP ThinPro)
B. t5540 (MS Windows CE)
C. t5730 (MS Windows XPe)
D. t5145 (HP ThinConnect)

Answer: D

18.The HP Compaq Thin Client Boot Order Change Tool enables you to change the boot order of a thin client remotely. What is the correct Linux command to set the boot order as USB/ Flash/Network?

A. ./hpbootorder -uhn
B. ./hpbootorder -oufn
C. hpbootorder.exe -uhn
D. hpbootorder.exe -oufn

Answer: A

19.Name the tool that:

-supports HP thin clients
-is included with every HP thin client
-does not require a license
-provides easy-to-use, scalable image deployment and recovery for SMB environments

A. HP ThinState
B. HP Image manager
C. HP Systems Insight Manager (HP SIM)
D. HP Client Automation (HPCA)

Answer: A

20.You want to configure your HP thin clients to boot from the network/ATA Flash/USB. What is the correct command to use?

A. bootorder.exe -wNH
B. bootorder.exe -wHU
C. bootorder.exe -oNHU
D. bootorder.exe -oUNH

Answer: C
