# Exam : HP2-K20

# Title:Supporting HPStorageWorks P2000Solutions

# Version : Demo

1.What is the minimum number of disks required to create a RAID 50 vdisk?

- A. 4
- B. 6
- C. 8
- D. 12

#### Answer: B

2. Which transport protocol is used to connect a P2000 G3 MSA to a D270 disk enclosure.?

- A. iSCSI
- B. Fibre Channel
- C. SAS
- D. SATA

#### Answer: C

#### 3. Which RAID level provides the best random mix I/O performance?

- A. 3
- B. 5
- C. 10
- D. 50

## Answer: C

4. Which types of hot spare disks are used in a P2000 G3 storage system? (Select two)

- A. pre-allocated
- B. global
- C. multi-purpose
- D. generic
- E. local

## Answer: B,D

5. Which statement is correct regarding the features of a P2000 G3 after an upgrade from a MSA2000 G2 storage array?

- A. Asynchronous replication can be used in single-controller configurations.
- B. The backend operates at 3Gb/s SAS speed.
- C. Two 4Gb/s Fibre Channel ports per controller can be used.
- D. The snapshot maximum is 255.

## Answer: A

6. How many snapshots can be used with an additional license in a P2000 G3 storage system?

- A. 8
- B. 16
- C. 64
- D. 512
- Answer: D

7.Which statement is correct regarding the management software of a P2000 G3 storage system?

A. It is OS platform independent.

- B. It can be used on Windows and Linux hosts.
- C. It can only be used on Windows hosts.
- D. It can be used on Windows and HP-UX hosts.

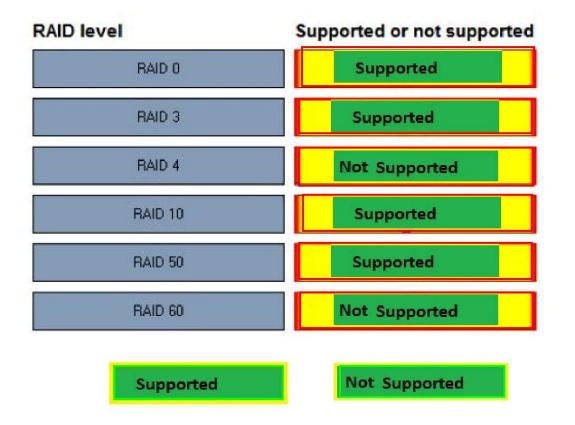

#### Answer: A

#### 8.DRAG DROP

Identify the supported RAID levels in a P2000 G3 storage array.

Answer:

9.What are benefits of the P2000 G3 array over its predecessor, the P2000 G2 array? (Select two.)

- A. optional Volume Copy software
- B. 8Gbps SAS architecture
- C. 2GB cache
- D. 50 percent increase in maximum SFF drives up to 149
- E. Remote Snap functionality as standard

## Answer: C,D

10.Which statement is correct regarding the use of Fibre Channel and iSCSI ports on a Controller of a P2000 G3?

- A. FC and iSCSI ports can use the same LUN at the same time.
- B. FC and iSCSI ports can be used simultaneously.
- C. FC and iSCSI ports can be used simultaneously only on different controllers.
- D. FC and iSCSI ports can use the same LUN at the same time only on different controllers.

## Answer: B
