Q&A

Exam : **HP5-H07D**

Title : Delta - Sales Essentials of HP Workstations

Version : DEMO

1.Why choose one HPC workstation solution over another?

A. primarily driven by application support

B. primarily driven by costs

C. primarily driven by capabilities

D. primarily driven by skills

Answer: D

2.Which employees at media and entertainment businesses are likely candidates for HP workstations?

A. marketing professionals touching up photos for an office event

B. office administrators who use office suites

C. artists who create on large canvases using displays

D. accountants who maintain business records

Answer: B

3.How is the performance of a storage device measured?

A. total bytes written

B. mean time between failures

C. by read/write or seek speed

D. per megabyte

Answer: D

Explanation:

The capability of a storage system to transfer a fixed amount of data in a measured time is known as throughput, or bandwidth. Typically, throughput is measured in megabytes per second (MBps) or similar units.
