Bessere Qualität , bessere Dienstleistungen!

Q&A

Exam : **TMSTE**

Title : TMap® Suite Test Engineer

Version : DEMO

1.Why is it important for a tester to be convincing and persistent when reporting a defect?
A. It benefits the product quality

B. to make sure all defects are resolved

C. to convince a client to not go live

Answer: A

2.See the specification below:

```
IF          A OR B

THEN        Error message

ELSE

            IF          C AND D

            THEN        Y=100

            ENDIF

ENDIF
```

The test design technique Elementary Comparison Test has been used with coverage type decision points with mooted condition/decision coverage When is the correspond graph?

A. 1

B. 2

C. 3

D. 4

Answer: C

3.What is coverage based testing?

A. a way to create a full set of test cases to cover all risks

B. a way to derive test situations based on an analysis of the test basis and selected coverage types

C. a way n which the tester is free to design test cases m advance or to create them during test execution

D. a way m which a virtual group of testers across the world (a 'crowd") is involved in testing.

Answer: C

4.In traditional system development environments, what is meant by the concept test level?

A. the information that defines the required system behavior

B. a group of test activities with the intention of checking the information system in respect of a number of correlated quality characteristics

C. a group of test activities that are managed and executed collectively

Answer: A

5.See the specification below:

A specification has parameters A, B and C .

A and B each have 3 equivalence classes and C has 2 equivalence classes

What is the minimum number of lest station that is generated if the coverage type Pair wise Testing is used?

A. 3

B. 6

C. 9

D. 18

Answer: A
