Q&A

Exam : **S1000-008**

Title : IBM PowerHA SystemMirror V7.2.5 AIX Administrator Specialty

Version : DEMO

1.Why is it important to perform administrative tasks on a cluster?

A. To ensure that the cluster remains in a constant state without updates

B. To maintain system security and operational efficiency

C. To increase the complexity of the system

D. To ensure that all nodes are utilized at maximum capacity at all times

Answer: B

2.Which options are available when creating a cluster in PowerHA?

A. Standard or Stretched cluster

B. Standard cluster only

C. Standard, Linked, or Stretched cluster

D. Standard or Extended Distance cluster

Answer: C

3.What are critical considerations when performing management tasks on a cluster? (Choose Two)

A. Maintaining consistent configuration across all nodes

B. Using different operating systems on each node for diversity

C. Documenting any changes made to the cluster configuration

D. Maximizing the utilization of a single node before using others

Answer: AC

4.Identify the critical elements to review when explaining methods used to deploy a solution. (Choose Three)

A. The impact of the deployment on existing workflows

B. The downtime associated with the deployment

C. The cost implications of different deployment methods

D. The color preferences for the deployment interface

E. The scalability of the deployed solution

Answer: ABE

5.Which resource group state indicates that the resource group is online and serving its intended function?

A. ONLINE

B. OFFLINE

C. STARTING

D. ERROR

Answer: A
